

Blueprint Specification Dossier

TestProject

Generated by BlueprintAI on 5/10/2026

Documents Included

- 1. Business Requirements Document — Business Requirements Document (V1)
- 2. Software Requirements Specification — Software Requirements Specification (V1)
- 3. User Stories — User Stories (V1)
- 4. REST API Design — REST API Design (V1)
- 5. Database Schema — Database Schema (V1)

Business Requirements Document

Type: Business Requirements Document | Version: V1 | Updated: 5/10/2026

Executive Summary

BlueprintAI streamlines AI-powered specification workflows.

Business Problem

Manual requirements authoring is slow and inconsistent.

Business Objectives

- Reduce authoring time by 70%
- Standardize team artifacts

Project Scope

- [In Scope] BRD generation
- [In Scope] SRS generation
- [In Scope] Export to PDF/MD
- [Out of Scope] Automated code deployment

Stakeholders

Role	Description
Product Manager	Defines vision and scope
Engineering Lead	Validates technical feasibility

Business Requirements

ID	Title	Priority	Description
BR-1	Export Docs	High	Export to Markdown and PDF

Software Requirements Specification

Type: Software Requirements Specification | Version: V1 | Updated: 5/10/2026

1. System Overview

BlueprintAI is a microservice-ready Node.js & React platform.

3. Functional Requirements

ID	Category	Title	Priority	Description
FR-1	—	Auth Service	High	JWT cookie-based auth

4. Non-Functional Requirements

Category	Requirement	Metric / SLA
Security	All endpoints protected with helmet & JWT	Target SLA

User Stories

Type: User Stories | Version: V1 | Updated: 5/10/2026

User Story Cards

[US-01] Export to PDF

[High]

Acceptance Criteria / Notes:

- Given a completed document, when I click export PDF, then it downloads cleanly.

REST API Design

Type: REST API Design | Version: V1 | Updated: 5/10/2026

API Overview & Base URL

Base URL: /api/v1

Resource Group: Endpoints

GET /api/projects/:projectId/export

[Public]

Read-only stream endpoint supporting single or all document exports.

Read-only stream endpoint supporting single or all document exports.

Database Schema

Type: Database Schema | Version: V1 | Updated: 5/10/2026

Database Entities & Schemas

Table: documents

Stores generated specification documents

Field	Type	Constraints
id	UUID	PK, Required
projectId	UUID	Required
type	VARCHAR(50)	Required
status	VARCHAR(20)	Required

Acceptance Criteria / Notes:
- Relationship: N:1 !' projects (projectId)

Entity Relationship Diagram & Schema Definition

```
erDiagram
    PROJECTS ||--o{ DOCUMENTS : contains
    PROJECTS {
        uuid id PK
        string title
    }
    DOCUMENTS {
        uuid id PK
        uuid projectId FK
        string type
    }
```
